

SHRIKANT GOSKI

Backend Developer – Node.js, NestJS, Microservices | Module Lead

+91 9561252643 | goshikshrikant111@gmail.com | Bangalore | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend Developer with 5+ years of experience designing and building scalable, high-performance backend systems using Node.js and NestJS. Hands-on experience with microservices architecture, event-driven systems using Kafka and RabbitMQ, Redis caching, and secure REST APIs. Strong background across relational and NoSQL databases (PostgreSQL, MySQL, MongoDB, DynamoDB) and cloud platforms (AWS, Azure), with hands-on Docker/Kubernetes deployment experience. Proven Module Lead with a strong foundation in Data Structures & Algorithms, system design, and database performance tuning.

TECHNICAL SKILLS

Node.js Ecosystem: Node.js, NestJS, Express.js, Fastify, TypeScript, Kafka, RabbitMQ, Redis, REST APIs, Swagger/OpenAPI, TypeORM, Jest

Architecture & Design: Microservices, Event-Driven Architecture, LLD, HLD, System Design, SOLID Principles, Design Patterns

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Cloud & DevOps: AWS (Lambda, S3, EC2, SQS, SNS, KMS), Azure (B2C, Blob Storage, Functions), Docker, Kubernetes

CS Fundamentals: Data Structures & Algorithms (DSA), Low Level Design (LLD), High Level Design (HLD)

Tools: Git, Visual Studio Code, Cursor

PROFESSIONAL EXPERIENCE

Module Lead – Backend Engineering (Node.js)

Jan 2023 – Present

Trigent Software Pvt. Ltd. | Bangalore

- Led backend module development in Node.js, TypeScript, and NestJS, defining API standards and conducting code reviews to accelerate releases by 30%.
- Architected secure microservices with RBAC and token-based authentication, strengthening access control and compliance across distributed services.
- Used Kafka and RabbitMQ for asynchronous, event-driven communication between microservices, improving decoupling and system reliability.
- Introduced Redis for caching frequently accessed data, reducing repeated database load and improving API response times.
- Optimized PostgreSQL/MySQL queries and indexing strategies, reducing heavy query execution time by 45%.
- Automated scheduled jobs (cron/Bull) for data validation and processing workflows, minimizing manual effort and errors.
- Containerized services with Docker and managed deployments on Kubernetes for consistent, scalable environments.
- Enhanced observability via structured logging and alerting, improving overall service availability by 20%.
- Mentored junior engineers on Node.js best practices, testing patterns, and code quality — cutting regressions by 35%.

Software Development Engineer – Node.js Backend

Apr 2021 – Dec 2022

Text Mercato Solutions Pvt. Ltd. | Bangalore

- Built and maintained RESTful APIs and data ingestion pipelines using Node.js and Express.js, ensuring reliable integrations with versioned endpoints.
- Engineered ETL workflows and cron jobs to automate reporting and back-office operations, saving 10+ hours per week.
- Implemented JWT-based authentication and role-based authorization, elevating security and enforcing least-privilege access.
- Designed schemas and indexes across MongoDB and relational databases to significantly improve query efficiency.
- Reduced API latency by 44% — from 320ms to 180ms — by optimizing critical Node.js data paths and database access patterns.
- Introduced unit tests (Jest) and rigorous code reviews to stabilize releases, reducing production incidents by 30%.
- Decomposed monolithic features into Node.js microservices and resilient REST endpoints, improving service availability by 15%.

KEY PROJECTS

Packtrak – Shipment Management System | IBC

- Modernized a legacy Informix-based shipment system to a cloud-backed stack using Node.js, AngularJS, Azure, and PostgreSQL.
- Architected and delivered 70+ Node.js REST APIs with advanced search, pagination, and cron-based automated validation — cutting manual workload by 40%.
- Implemented Azure B2C authentication, optimized PostgreSQL stored procedures, and integrated Blob Storage for file operations — raising billing accuracy by 25%.

Shure Associate Portal | Shure

- Built 30+ REST APIs with NestJS Guards for RBAC — strengthening backend security across microservices by 30%.
- Automated DynamoDB test data cleanup, boosting QA efficiency by 25% and reinforcing audit and permission schema integrity.

TaskRunnr – Data Processing Platform | Text Mercato Solutions Pvt. Ltd.

- Delivered ingestion APIs (Node.js, Express, MongoDB) achieving 99% data accuracy and powering daily operational reports.
- Automated cron-based reporting pipelines, increasing operational efficiency and billing precision by 20%.

Kriya – End-to-End Workflow Automation | Kriya

- Built Node.js file processing endpoints, web scraping services, and an AWS-based delivery pipeline — reducing manual intervention by 50%.
- Streamlined delivery pipelines, accelerating client turnaround time by 30% and enhancing release reliability by 20%.

EDUCATION

B.E. in Engineering

June 2019

N K Orchid College of Engineering & Technology, Solapur

ACHIEVEMENTS

- Sparkler Award – Trigent Software (Q1 2024): Recognized for driving backend automation and Node.js API optimization, significantly improving client delivery speed and quality.

CORE COMPETENCIES

Node.js & NestJS Architecture • Microservices • Kafka & RabbitMQ • Redis Caching • REST API Design • System Design (HLD) • Low Level Design (LLD) • Data Structures & Algorithms (DSA) • Database Optimization • RBAC & Auth Patterns • Docker & Kubernetes • Backend Automation • Technical Mentorship
